

Ed. note:

ISTEA stands for Intermodal Surface Transportation Efficiency Act – If these funds were being used there would be some actual standards to meet for the project. Note that Commissioner Rader's policy advisor did not want there to be such funds used for the project.

Subject:

Debbie: The ISTE A funds were about to expire on this project ,so instead of the County losing those , we shifted to another TE project within the County ---- a streetscape project that has been constructed. The previous main holdup on this project was getting approval from CSX RR as to where to make the ped crossing/over/underpass and getting the details on that worked out. This project then became a local funded (with PATH funds also)project with a combination of funding types.

Subject: ISTE A funds

Richard, could you please ask Dave Pelton whether ISTE A funds are still involved with the Mason Mill portion of the trail or were they not used in time and turned back ?
(I hope not ..)
