Pete:

Thank you for confirming yesterday that you will be able to save the trees we discussed several months ago that stand along the south side of W. Howard. (Just east of the MARTA tunnel, four maples, one cottonwood and three pines.) Per your instructions, I have placed orange tape marked "save as per Pete" on all of these trees. I have limbed up the north side of the hardwoods, also as you requested. My understanding is that the tree/large shrub just east of the tunnel and before the first maple will not be saved and there is also an apple tree in the area between the pines that we did not discuss, so I have not marked either tree.

Again, I really appreciate the fact that these trees will be saved. Have a good weekend.

Best,

James Alec Gelin
